

A Wider, Stronger Automotive Frame Machine - CJJ, Inc. Releases its Newest Auto Body Repair Equipment, the American Freedom GT

CJJ, Inc. releases its newest auto body repair equipment, the American Freedom GT automotive collision repair frame machine. This frame machine is a wide 92 inches. Allowing auto body shops to increase their productivity, by accepting heavier and wider vehicles, is the number one benefit of this new machine.

Detroit Lakes, MN ([PRWEB](#)) August 8, 2010 -- Features of the American Freedom GT include; a 92 inch wide platform, working heights as low as 12 inches and as high as 42 inches in addition to a 12,000 pound lift capacity. Allowing auto body shops to increase their productivity, by accepting heavier and wider vehicles, is the number one benefit of this new machine.

CJJ, Inc. has been working continually to put forward an automotive frame machine that will easily handle the increasing size of vehicles on the road today. "Our customers are our greatest motivation in the production of our product lines, they know what they need and we want to provide machines capable of handling their needs." Darren Bremseth, CJJ, Inc.

CJJ, Inc. prides itself on producing quality right here in the USA as it has for almost 25 years!
